Cloud-enabled 24/7 remote monitoring service for your critical assets

EcoStruxure Asset Advisor for Secure Power and Cooling at a glance

This cloud-based service monitors your critical equipment, delivers insights and smart alarming directly to your mobile – proactively helping you minimize downtime. Instant access to live sensor data via the mobile app provides visibility into your assets' health and lifecycle, whether on premise or on the go.

A 24/7 remote expert troubleshooting service increases peace of mind and speeds up issue resolution through community-based chat with your team or the Schneider Electric Connected Services Hub.

24/7 alarm monitoring and data visibility

Incidents are automatically recorded and tracked, enabling easy access to real-time incident status and latest device data – without the need to log into VPN.

Gain insights into your infrastructure

Machine data forms the basis of long-term operational insights and analytics. The monthly report delivers tailored recommendations for optimizing performance across the physical and IT layer that help reduce equipment maintenance costs.

Engage the right team

Immediately identify who is on duty on site or close by. For troubleshooting, connect through chat with your team or the Schneider Electric Connected Services Hub or request the help of a field service representative.

"Peace of mind knowing that you have reliable power and cooling infrastructure in place is one thing; but being able to monitor the data center and look at it as a whole brings in an entirely new level of stress relief."

*Jeff Gardner
Critical Facility Manager, RSA*
